DELIVERABLE 3 : USE-CASE FLOW SPECIFICATION

FIELD	VALUE
Use Case ID	UC-03
Use Case	Submit Timesheet
Primary Actor	Remote Developer
Supporting Actor	Engineering Manager

Preconditions

1. The Remote Developer is authenticated.
2. The developer has access to an active project.
3. The developer has logged time against valid project tasks.
4. The timesheet does not contain more than 24 hours for any calendar day.

Postconditions

SUCCESS

- The timesheet is submitted.
- The timesheet status changes to Pending Approval.
- The assigned Engineering Manager can view the submitted timesheet.

FAILURE

- The timesheet remains unsubmitted.
- The developer is shown the relevant validation error.

Main Success Scenario

1. The Remote Developer opens the Timesheet section.
2. The system displays the developer's current timesheet.
3. The developer reviews the logged hours against project tasks.
4. The developer selects "Submit Timesheet".
5. The system validates the timesheet.
6. The system verifies that no calendar day exceeds 24 hours.
7. The system records the submission.
8. The system changes the timesheet status to "Pending Approval".
9. The system makes the timesheet available to the assigned Engineering Manager.
10. The system displays a submission confirmation.
11. The use case ends successfully.

Alternate Flow - Timesheet Exceeds 24 hrs

1. The system detects that a calendar day contains more than 24 hours.
2. The system prevents the submission.
3. The system identifies the day containing the invalid total.
4. The system displays an error message to the developer.
5. The developer corrects the logged hours.
6. The developer submits the timesheet again.
7. The system repeats validation.
